LE BON MIX !*

HIGH PERFORMANCE SILAGE UNLOADING UP TO 5 M

The loading phase is a critical moment in the preparation of the ration. The millhead must have a high torque while preserving the quality of the raw materials used. Its 116 HP engine ensures a high working output in all types of material.

360° GLASS CAB

A panoramic glass cab designed specifically for this machine, it offers optimum driving visibility and operating comfort. It ensures precise silo approach and silage unloading when preparing the ration from the top to the bottom of the silo. The 360° opening of the cab guarantees safe and smooth operation during the driving phase.

COMPACT & MANOEUVRABLE

Designed to operate on the road at speed of up to 25 km/h, but also in all farmyards thanks to its low overall height of 2.52 m and its rear steering axle. Manoeuvring at the end of buildings or at silo exits becomes child's play thanks to its short turning radius of 6.50m.

COMFORT OF USE

The machine is equipped with a hydrostatic foot pedal for smooth and precise control. Inside the cab, the pneumatic seat is coupled to the armrest to keep control during movement. The various driving elements are easily visible and accessible: programmable weighing box, driving assistance camera.

AN EXCEPTIONAL MIX

Based on our 30 years of experience in mixed rations, the Autospire Compact benefits from a solid know-how to distribute day after day an optimal mixing quality. Its rolled tank combined with its stepped auger and 2 counter knives guarantee a perfectly homogeneous mix.

CONFIGURABLE DISTRIBUTION

This machine has a rear left or rear right distribution trap door as standard. As an option, a right front trap door ensures distribution on both sides of the feed alley. To distribute as close as possible to the feed fence, a side conveyor under the trap door or an elevating conveyor are also available.

SIMPLE MAINTENANCE

The various parts of the machine that require regular maintenance are easily accessible. The position of the engine at the rear allows direct access to the oil level, filters and fans.

* THE RIGHT MIX!

AUTOSPIRE ¹²⁰ COMPACT ¹⁴⁰ ¹⁶⁰

Autospire Compact	120	140	160
Capacity (m ³)	12	14	16
Number of augers / knives	1 auger / 6 knives		
Engine / Cylinders	156 HP / 4 cylinders		
Tank / AdBlue	250 L / 25 L		
Mill: Diameter / Width / Power	625 mm / 2 m / 116 HP		
Disilage height	5 m		
Distribution height	250 mm		
Overall height	2,52 m	2,80 m	3,07 m
Overall width	2,40 m		
Overall length	7,61 m	7,73 m	7,85 m
Speed	25 km / h		
Tyres	Front 445 / 45 R19,5 - Rear 285 / 70 R 19,5		
Unladen weight	10 200 kg	10 400 kg	10 600 kg
